Menif Aicha

Summary

Third-year E-Business student at ESSECT, among the top-performing students in my university, with a strong technical background in computer science, information systems, web development, databases, artificial intelligence, and digital technologies. Alongside my technical studies, I have developed a strong passion for art, creativity, and theatre. I am highly curious and passionate about learning, discovering new experiences, and exploring new subjects. I particularly enjoy researching, understanding complex problems, finding answers, and developing practical solutions. I am always eager to learn, take on new challenges, and expand both my technical and creative skills.

Education

Licence – ESSECT | E-Business

Professional Experience

- Internship at Discovery
- Research Internship at Université Laval

Academic Projects

E-Commerce Web Platform

Web application with two access levels: user accounts, and an owner account able to add products and set prices. Users interact with each other through comments and ratings on products.

Challenge Platform

Platform for creating challenges, with user interaction through ratings and comments.

Student Study-Tracking Application (Java)

Java application helping students organize their studies through tracking dashboards, with AI-powered statistics on their progress.

Chatbot

Design and development of a chatbot.
